

1. Contour interval 10 feet
 2. Contour lines are labeled with their elevation
 3. Contour lines are perpendicular to the steepest slope
 4. Contour lines are closer together on steeper slopes
 5. Contour lines are further apart on gentler slopes
 6. Contour lines are never parallel to each other
 7. Contour lines are never closed curves
 8. Contour lines are never broken
 9. Contour lines are never double
 10. Contour lines are never curved
 11. Contour lines are never straight
 12. Contour lines are never curved
 13. Contour lines are never straight
 14. Contour lines are never curved
 15. Contour lines are never straight
